Fortnite – beyond the headlines

In the last few days, the online multi-player game Fortnite has been in the news and on TV for a range of reasons.

Establish good habits early on: Both adults and children enjoy sharing moments with family and friends through online images and videos. Starting conversations and good habits early on is a great way to support children in staying safe online.

Online
Safety at
Forton

If Fortnite is popular in your home, or your child has friends playing the game and they want to join in, then you will want to know what risks it may present, and how to best support your child.

We advise playing this 12 rated game with your child, so you can see what it's all about., From this, you can begin to understand the areas that may concern you – time limits, contact from other players, the nature of the violence in the game.

A great online guide is this one from MyKidsTime <http://bit.ly/fortniteparents> More advice from parents and practical tips on settings can be found at Ask About Games <http://www.askaboutgames.com/parents-guide-to-fortnite-peg-12>

Epic Games will be releasing Fortnite for Android devices this summer, but have warned that some sites, including YouTube are promoting 'early releases' of Fortnite for Android, which are scams or spyware. No Android version of Fortnite will be available until the official release, so beware of sites offering 'beta' versions.
